

Product Colors

MI Windows and Doors provides a variety of color options to complement the interior or exterior design of nearly any home.

Extrusions

Solid vinyl extrusions offer even color distribution inside and out for windows and doors that are timeless, durable, and attractive. MI offers three extruded colors, providing options for any home.

White

Adobe

Almond*

*Available on fin frame HomeMaker 3 Series products only. Not available with auto lock or SuperCapSR.

SuperCap SR™

SuperCapSR offers both durability and style for exterior color options. The coextruded color coating is scratch resistant and extremely durable, out-performing painted exterior colors in every field test. When tested by the elements, SuperCapSR colors stay bold and beautiful, regardless of exposure.

* Black and silver available with white interior only.

BENEFITS OF SUPERCAP SR

- Reflects 76% of infrared light to reduce vinyl profile heat-gain and potential profile distortion. Frames maintain dimensional integrity and won't melt, distort, or otherwise alter in heat.
- Fused, integral color layer is highly scratch-resistant. Acrylic color layer is thermally-fused to the vinyl profile, creating a molecular bond
- Durable colors won't crack, chip, flake, or chalk like paint. Highly scratch-resistant exterior color layer handles jobsite abuse better. Tough color layer diminishes or eliminates the need for touch-up. Long-lasting color, typically 450% thicker than typical paint layers, will not peel, blister, flake, or chalk
- SuperCapSR bronze matches popular color to provide extremely durable and cost-effective solution for any homes. Match popular clad-wood colors to provide added flexibility when developing window packages for upscale homes.
